DM AI CONNECTOR

Ask your facility.
It answers from live data.

Connect Claude, ChatGPT or any MCP assistant to the Pythia DM and ask in plain English. It answers, charts and even builds pages from your live data. (Illustrative examples, simulated data.)

07:00

Anything I should know this morning?

All quiet overnight. Two things to watch: CDU-1's filter is at 3.1 of 4.5 psi, and bulk fuel tank B is at 78%. Everything else is normal.

from: CDUs · fuel · all alarms

09:30

How long would the batteries last right now?

UPS A: 31 minutes at 1,300 kW. UPS B: 31 minutes at 1,288 kW. Every cabinet is on float and fully charged.

from: UPS · battery monitors

14:14

What's going on with the power?

Utility A was lost at 2:14 PM. Both generators on side A are starting, and UPS A is carrying side A on battery. Side B and every server are unaffected.

from: utility · generators · ATS · UPS

15:40

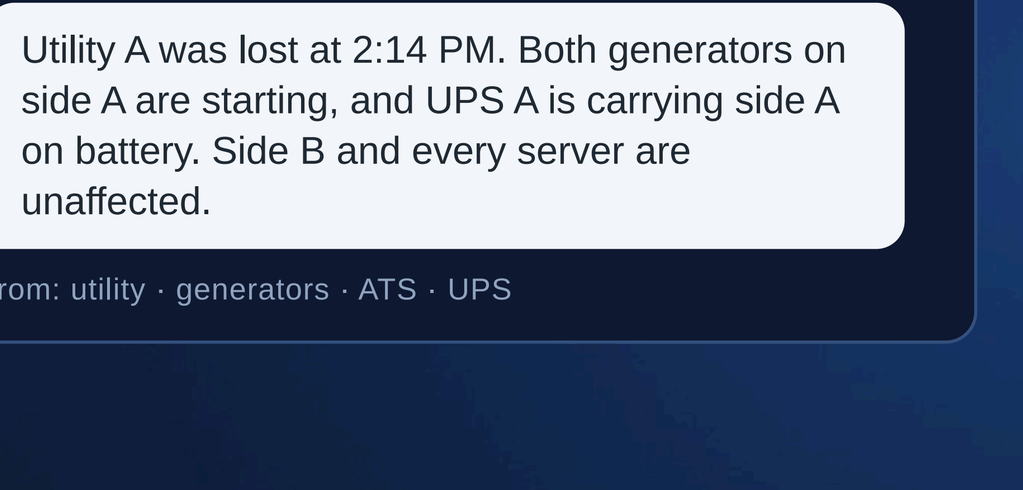

Can we take UPS B down on Saturday?

Yes. UPS A would carry 2,588 kW, 76% of its rating. Saturday mornings are the lightest load of the week, so start before 10:00.

from: UPS A · UPS B · trends

CHARTS AND DASHBOARDS, MADE FOR YOUR DM

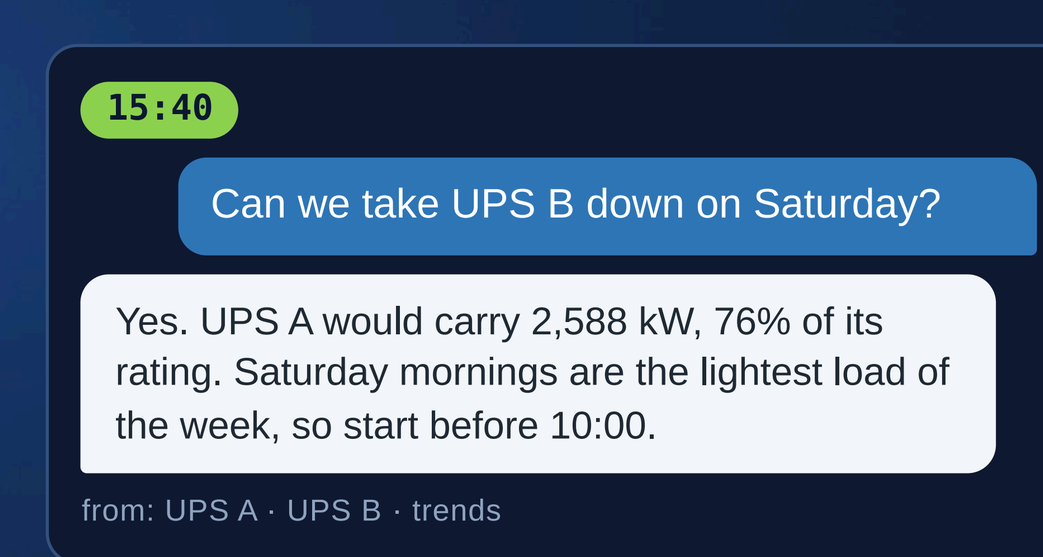

Chart UPS A's load and battery temperature for the last week.

Weekday peaks near 3 PM at 41%. Battery cabinets held 75 to 77°F all week.
